

RealROAS Server-Side Conversions for Magento 2

Installation Guide v1.0.0

Requirements

- Magento Open Source 2.4.x or Adobe Commerce 2.4.x
 - PHP 8.1 or later
 - Composer
 - SSH access to your server
-

Step 1: Install via Composer

Connect to your server via SSH and navigate to your Magento root directory:

```
cd /path/to/magento
```

Run the Composer require command:

```
composer require realroas/magento2-server-conversions
```

Step 2: Enable the Module

```
bin/magento module:enable RealROAS_ServerConversions
```

Step 3: Run Setup Upgrade

This creates the required database columns on the sales_order table:

```
bin/magento setup:upgrade
```

Step 4: Clear Cache

```
bin/magento cache:flush
```

Step 5: Verify Installation

Check that the module is enabled:

```
bin/magento module:status | grep RealROAS
```

Expected output:

```
RealROAS_ServerConversions
```

Step 6: Configure

1. Log in to Magento Admin
 2. Navigate to **Stores** → **Configuration** → **RealROAS** → **Server-Side Conversions**
 3. Enable the platforms you want to use (Google Ads, Meta, TikTok, Pinterest)
 4. Enter the required API credentials for each platform
 5. Save Configuration
-

Uninstallation

To remove the module:

```
bin/magento module:disable RealROAS_ServerConversions
composer remove realroas/magento2-server-conversions
bin/magento setup:upgrade
bin/magento cache:flush
```

Note: The database columns added to sales_order will remain but will not cause any issues.

Upgrading

To upgrade to a newer version:

```
composer update realroas/magento2-server-conversions
bin/magento setup:upgrade
bin/magento cache:flush
```
